it may take a few more decades but soon enough a i will turn into super a i this is an artificial intelligence which in all areas of what is now seen as human intelligence approaches this then surpasses it after that it will keep growing exponentially in the meantime at relatively short notice humanity will encounter a challenging a i bi bottleneck 1 humans possibly misusing a i in a big way and 2 a i spiraling into many directions of which any unfortunate one may be enough for disaster will we control a i or will a i dominate us let s hope this is the wrong question because if it s the right question and given enough time there is no shred of a doubt about the answer still of course we need to give it our best shot not to be dominated by an evil force we should strive for control at the same time transcending the question opens up the domain of compassion this gradually makes thinking in terms of control and domination in human a i interactions obsolete we will together strive for a better world within an alignment of our values but what are the real human values there are cultural and individual differences moreover what seem to be anyone s values may be a superficial layer above deeper values which are not necessarily congruent with conscious awareness so the human a i value alignment question will be how to align what i write in the journey about compassion as the striving to approach these values in their deeper sense they can subsequently be realized for each individual in two directions relief of deep suffering and enhancement of inner growth both notions are to be clarified at the individual level compassionate a i is the striving towards an a i that can help us to know and to realize ourselves in depth the beauty is that this way human a i value alignment and further development of a i can intrinsically go hand in hand lisa is a software coaching chat bot that is being developed specifically with this goal helping humans and a i in compassionate ways to become healthier stronger and more effectively compassionate towards near ones as well as all sentient beings in this book super a i is the future kind of a i that may be able but not necessarily to act compassionately we don t have to wait for that for compassionate a i to become important already humans can use a i more or less compassionately from what point is it relevant as a characteristic of the a i system itself regardless of how humans use the a i there is no steep border long before super a i the first systems in which it becomes more pertinent are those in which compassion is part of the purpose that is systems that in communication with users are meant to give an effectively compassionate experience to understand where compassionate a i may be heading towards we need to understand compassion this leads us on a journey starting on the one hand from data and

on the other hand from drive to thrive life itself on this journey we encounter many insights about intelligence consciousness drive to thrive non conscious processing the end of the journey lies in full compassion hopefully this is the future for a i as well as humanity
